# **MARCH ON WASHINGTON FOR JOBS AND FREEDOM**

## **REALIZING THE DREAM**

**D**espite the progress America has made over the last half century, we still have a way to go to fulfill the goals of the march. 30 percent of workers have low-wage jobs; voting rights are under relentless attack; the value of the minimum wage has eroded; income inequality is worsening; vital public services such as education and health care are under attack; 11 million aspiring Americans are forced to live in the shadows; and we still have an uneven system of justice rooted in stereotypes based on race, gender and class.
